

# Frequently Asked Questions

## Is Sugar Sheet™ paper made from 100% sugar cane fibre?

Yes, Sugar Sheet™ paper is produced with 100% sugar cane fibre, making it 100% forest-free.

## How does the quality of Sugar Sheet™ compare to traditional paper?

There is no discernable difference in quality, performance, or appearance of Sugar Sheet™ compared to traditional paper.

## Can Sugar Sheet™ be recycled?

Yes, Sugar Sheet™ paper is 100% recyclable in your blue bin.

## Does Sugar Sheet™ impact the food chain?

No, Sugar Sheet™ paper uses a byproduct of the sugar cane called bagasse. This waste would otherwise be burned into the atmosphere or tilled into the soil.

## Is Sugar Sheet™ more expensive than traditional paper?

No, there is no difference in price between Sugar Sheet™ and traditional wood-fibre paper. Sugar Sheet™ has been priced with business in mind.

## Where is Sugar Sheet™ produced?

Sugar Sheet™ is manufactured in Colombia at the world's only 100% sugar cane paper mill. The mill has been recognized for industry-leading environmental policies and practices.

## How does shipping from Colombia impact the environment?

The environmental impact from shipping by boat has been proven to be less than the environmental impact of transporting goods and materials by truck or rail. Therefore, shipping 1,000 nautical miles by boat is less harmful than shipping 200 miles by truck.
