

SOCIAL PRINT PAPER™

International Social Print Paper Ltd. is committed to continuously reducing the carbon required to manufacture Sugar Sheet Copy Paper in order to measurably support the emissions reduction and net-zero polices of industry, government, and education sector organizations. The carbon used to manufacture Sugar Sheet Copy Paper today is a fraction of the carbon required to manufacture a virgin copy paper from wood fibre. We commit to further reduce Scope 1 and Scope 2 emissions from 2019 levels by 50% before 2030.

Here is a table highlighting progress to date:

	2019		2020		2021		2022	
	Scope 1	Scope 2	Scope 1	Scope 2	Scope 1	Scope 2	Scope 1	Scope 2
Emissions (CO2 eq Tons)	918.802	11.69	862.531	19.704	786.245	11.702	761.673	11.636
Total	930.492		882.235		797.947		772.993	

***The greenhouse gas measurements are carried out with a one-year delay.**

As a means of getting to carbon neutral immediately, Social Print Paper has partnered with the organization 1 Tree Planted to support a reforestation project through the purchase of carbon offsets. All purchases of Sugar Sheet Copy Paper are now carbon neutral.

Additionally, Sugar Sheet Copy Paper is produced in a mill that maintains ISO 9001, 14001 and 45001 certification ensuring global standards for quality control management, environmental management and performance, and occupational health & safety management.

If you have questions or comments we'd like to hear from you. Please email info@socialprint.com.
